Vol. 3

*Ad astra  
per aspera!*

June 18,

*It's hard to believe it's been six years since I began researching the strange and wondrous secrets of Gravity Falls, Oregon.*

*In all my travels, never have I observed so many curious things! Gravity Falls is indeed a geographical oddity.*

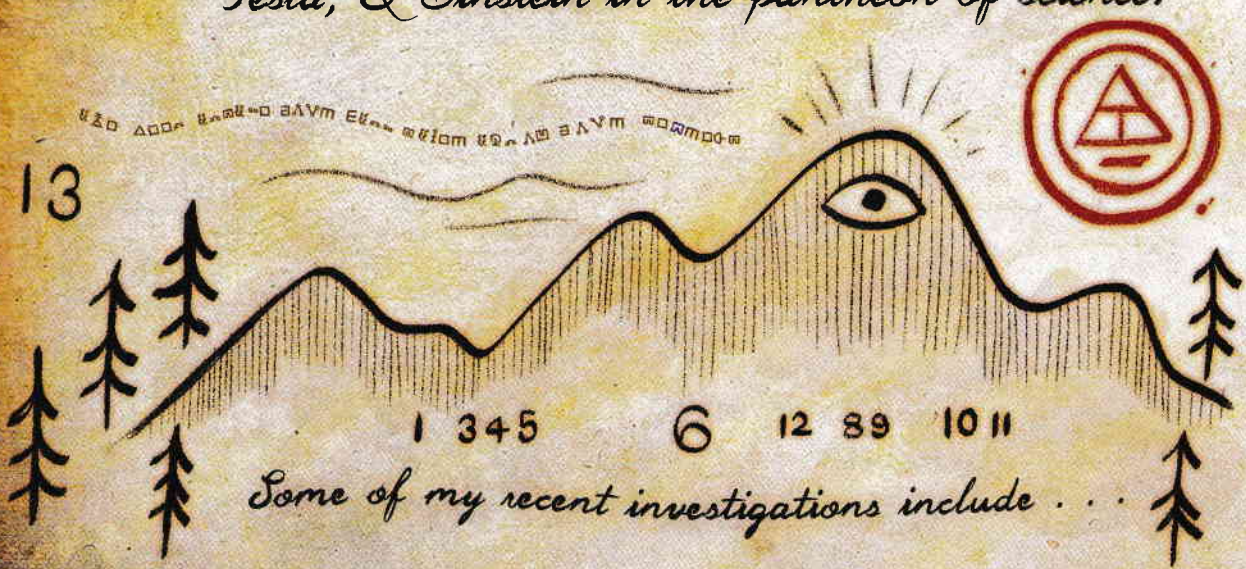

But the strangest thing about this town is the question: WHY?? Why is it that this one remote location houses more paranormal, alter-average, and super-usual phenomena than any other location on Earth? There must be a hidden law of nature, a "Grand Unified Theory of Weirdness," which explains how everything in Gravity Falls is connected. My benefactors trust that I will use their grant money to discover something incredible, and I believe this Theory could be it.

MY CONTINUING MISSION:

Investigate the Oddities of Gravity Falls

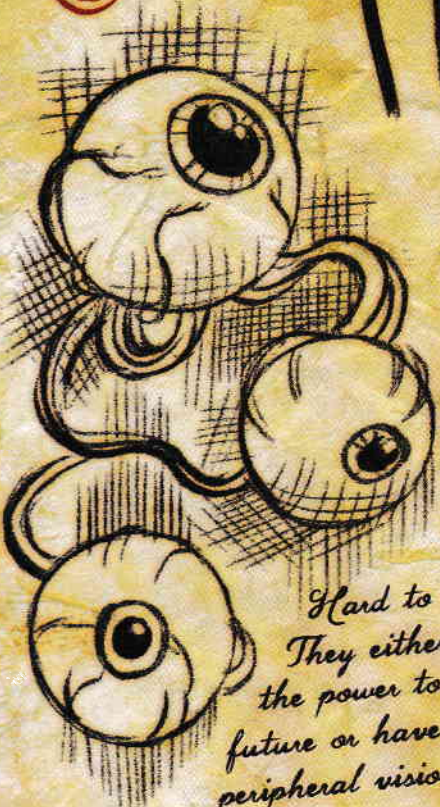

Discover the GRAND UNIFIED THEORY OF WEIRDNESS

Publish theory and join the ranks of Newton, Tesla, & Einstein in the pantheon of science!

Do they ever need glasses??

# "FLOATING EYEBALLS"

THE  
MUSE  
OF  
THE  
EYE

are they watching me?

Hard to catch.  
They either have  
the power to see the  
future or have amazing  
peripheral vision!

Yes. What  
else would floating  
eyeballs be doing?

- VISIBLE ONLY AT NIGHT
- NO RETINAL CORD
- NO RESPONSE TO CONTACT

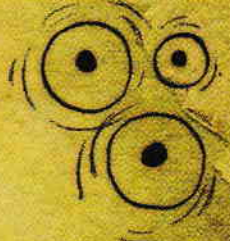

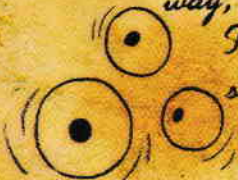

Were they ever a part of some more complete magical creature or have they always been disembodied eyes? Either way, they're deeply unsettling! They will just hover there staring you down. Like

~~one of those~~ portraits whose eyes follow

...ent  
...ter it.

Why  
...tion  
...you  
...rem

Do not sleep with your windows open.

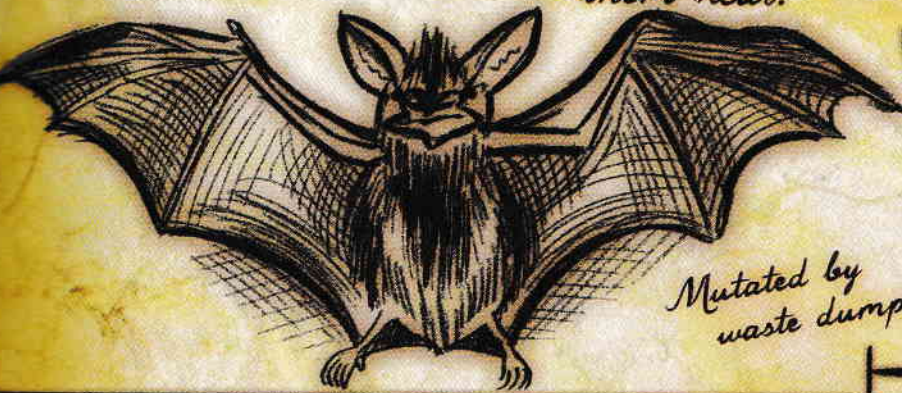

DESMODUS ROTUNDUS is small, short-haired, and even-tempered. Nothing like Gravity Falls'

never slobber with them near.

# GIANT VAMPIRE BATS!!

Mutated by waste dump?

— 10 FEET

The summer heat seems to draw them from their caves. The locals pretend it's "mosquito season," but then why not use bug spray instead of garlic necklaces? Who do they think they are fooling? The bats will settle for cows or sheep but would much rather feed off some feeble human. Human blood tastes better than ~~sheep~~. I can only ASSUME human blood tastes better.

I have not sampled human blood.

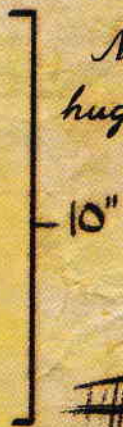

LEPIDS

We know books

Common height is ten to eighteen inches. This includes the hat. They refuse to remove their hats. Do they have pointy heads?

Unkempt beards.

Mushrooms are a huge part of the gnome's life.

Used for money?

Almost lost a finger trying to grab the hat.

Several tried to "kidnap" me as an "offering to the queen" as I was sleeping, but I just drop-kicked them out the window when I awoke. Unsettling.

# WEAKNESS:

# leaf blowers

POINTY HATS!!

I saw one taking a "squirrel bath." I wish I could un-see this.
