REGNUL MONERA (PROCARIOTA)

A. Bacterii (*Filum Bacteriophyta*)

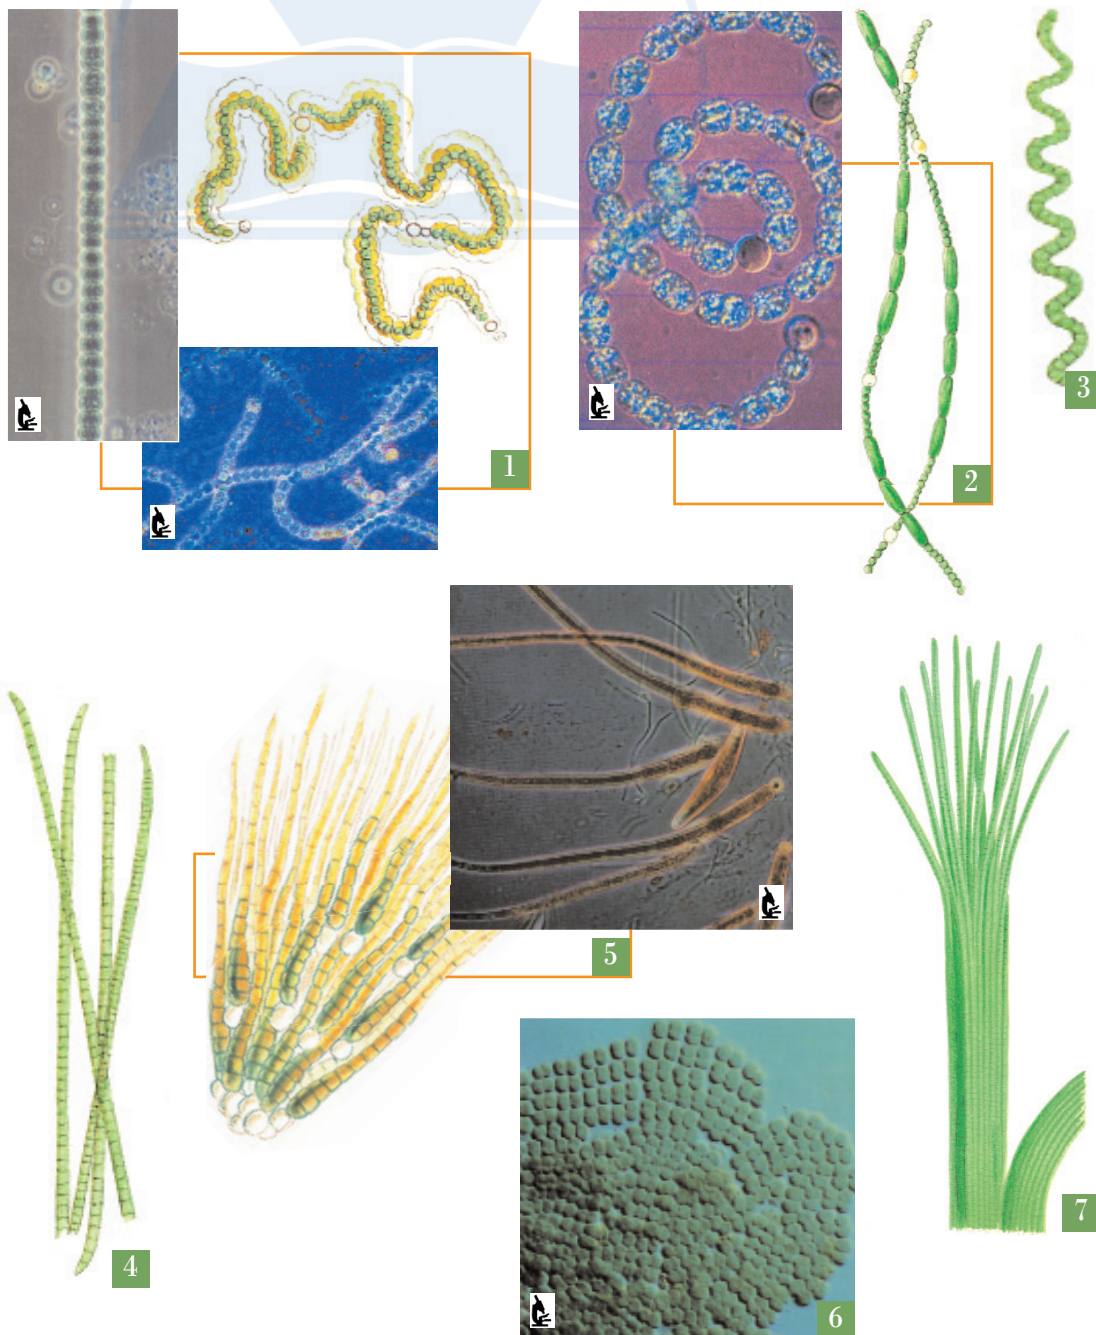

I. Structura unei bacterii

II. Tipuri morfologice de bacterii: 1. Cocci; 2. Bacili; 3. Spirili; 4. Bacteria *Escherichia coli* din intestinul gros al omului; 5. Bacterii sulfuroase (sulfobacterii); 6. Bacterie fixatoare de azot (*Azotobacter sp.*). (Imagini văzute la microscop.)

B. Alge albastre-verzi (*Filumul Cyanophyta*)

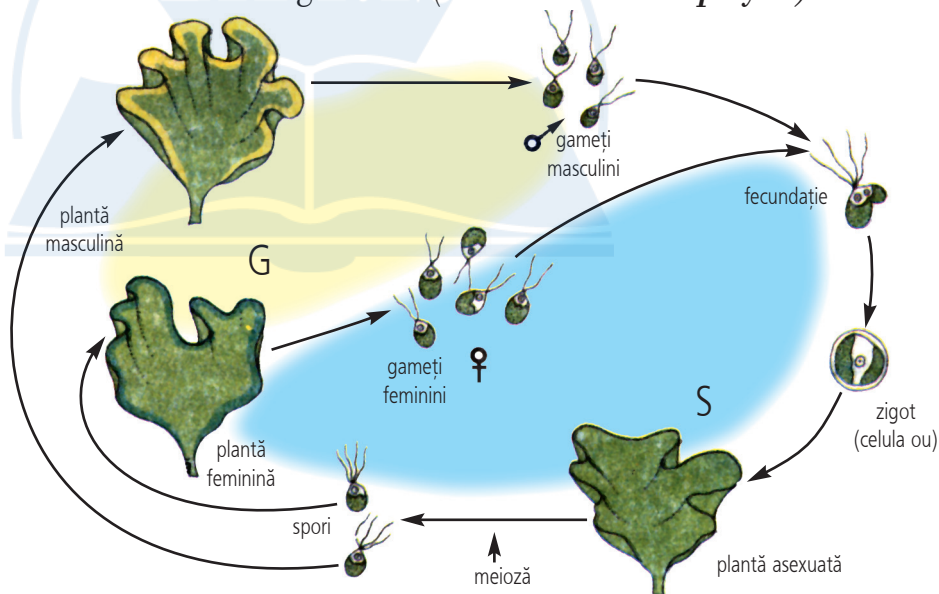

1. Cleul-pământului (*Nostoc commune*); 2. *Anabaena inaequalis*; 3. *Spirulina jenneri*; 4. *Oscillatoria antilaria*; 5. *Gloeotrichia pisorum*; 6. *Merismopedia* sp.; 7. *Microcoleus terrestris*.

II

REGNUL PROTISTA (PROTOCTISTA)

A. Alge verzi (*Filumul Chlorophyta*)

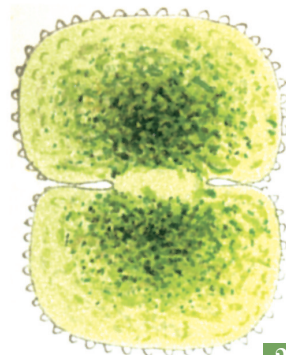

I. Ciclul de viață la alga verde (*Ulva lactuca*); G – gametofit; S – sporofit.

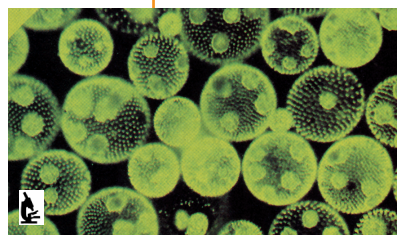

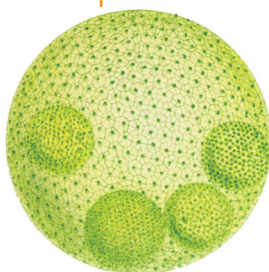

3

1

2

4

II. Tipuri de alge verzi: 1. *Pediatrum bidentatum*; 2. *Cosmarium conspersum*; 3. *Closterium moniliferum*; 4. *Volvox globator*.
